Profile

Creative programmer adept in web development with more than seven years of industry experience. A team player, detail-oriented, self-driven, comfortably working in remote and agile environments with a learner mindset.

Experience

FRONTEND ENGINEER, ONPREM – JUN 2021 - PRESENT

Implemented features for web and mobile applications with a sustained focus on the user experience through design, performance, accessibility, internationalization, analytics and security. **Techs:** React, React Native, Redux, Typescript, Axios, Jest, Enzyme, HTML5, SASS, BEM, Flexbox, i18n, a11y, Kendo, Webpack, GitLab, Figma, Jira

FRONTEND ENGINEER, IYUNO – JUN 2020 - MAY 2021

Implemented Implemented features for two web apps. Built a video player from scratch using HTML5 media elements and Web Audio API to split and merge original audio with dubbed audio to cast media entertainment talents. **Techs:** React, Redux, Next, Typescript, Styled Components, HTML5, Flexbox, Ant Design, GitLab, Jira

FULLSTACK ENGINEER, INDEED – MAR 2020 - MAY 2020

Implemented an MVP to automate and build reports in different formats like docx and pdf pulling data from sources like APIs and scrape **Techs:** React, Node, Express, pm2, MongoDB, puppeteer, GraphQL, Axios, docx, pdfkit, GitHub, Jira

FRONTEND ENGINEER, ACLARA – JAN 2019 - FEB 2020

Contribute on the style guide documentation and the CommonUI package to provide components, assets, fonts, colors, scales, to several interdependent projects that were part of one solution using semantic versioning. **Techs:** Angular, angularJS, Typescript, SAAS, Flexbox, Bootstrap, InVision, Mapbox, Moment, Kendo, Nuget, TFS, Git, VSTS, Jira

FULLSTACK ENGINEER, ACLARA – JAN 2018 - JAN 2019

Implemented features in a complex SaaS application called AclaraONE to manage electricity, water and gas networks in the cloud writing cross-browser compatible code. Built end to end functionalities based on mockups and written specifications from product owners. Created APIs to consume data from different databases: relational and non-relational. **Techs:** Angular, angularJS, Jasmine, Typescript, Moment, Kendo, Bootstrap, SAAS, .NET, SQL Server, Cassandra, TFS, Git, VSTS, Jira

FULLSTACK ENGINEER, ACLARA – APR 2017 - JAN 2018

Migrated a legacy ASP.NET water management system called MDM Water to the .NET Framework 4.5 and angularJS. Built UI from scratch. Implemented APIs and store procedures in SQL. **Techs:** angularJS, jQuery, Jasmine, Moment, Kendo, Bootstrap, SAAS, .NET, Entity Framework, Code First, SQL Server, TFS, Git, VSTS, Jira

FRONTEND ENGINEER, DELOITTE – SEP 2016 - APR 2017

Implemented a web app with large forms. Participated in backlog grooming and planning sessions, task estimations and retrospectives. Collaborated with the team doing pair programming and code reviews. **Techs:** angularJS, jQuery, Jasmine, Kendo, Bootstrap, SAAS, .NET, SQL Server, TFS, Jira

FRONTEND ENGINEER, PWC – APR 2015 - SEP 2016

Transformed mockups and wireframes into pixel perfect UI. Contributed on data visualization charts and scatterplots with D3. Participated in planning sessions, tasks estimations, retrospectives and brainstormings to propose improvements and new features. **Techs:** angularJS, jQuery, Jasmine, D3, Bootstrap, SAAS, TFS, Jira

Degree

Systems Analyst – 2015

Soft Skills

Accountable. Focus on user experience. Communication driven.

Languages

English: upper-intermediate. Italian: A2. Native spanish.
